

## **EDICTUM CENSORIUM DE RELATIONE CENSUS 2772 AUC**

With the completion of census registrations and the celebrations of the ceremonies of the Lustrum, we, the censores suffecti, A. Tullia Scholastica and C. Tullius Valerianus Germanicus, speaking also for the past censores who started and presided over the current census the former censor Sex. Lucilius Tutor and the the late censor Cn. Cornelius Lentulus Alexander who passed away under the census period, hereby officially edict, declare, proclaim and announce the Census of the Nova Roman People of the Quirites and the Nova Roman Republic completed and closed. The Nova Roman People, all of our citizens who registered on the census, have been ritually purified and lustrated and renewed for a new period, and propitious blessings from the gods immortal of the Roman people are now being received for the lives of our citizens and for new works in our mission to restore the Roman nation, state and culture. This edict contains the "Relatio Censús Q. Arrio Nauta et P. Annaeo Constantino Placido consulibus" (Census 2019 Report) which reports the census period that started in the consulship of Q. Arrius and P. Annaeus (11 March 2019) and was completed in the second consulship of Q. Arrius and in the third of T. Domitius (31 December 2020).

### **Census 2019 Report by Censores A. Tullia Scholastica and C. Tullius Valerianus Germanicus**

The current census was completed in two periods, started under the censorship of Sex. Lucilius and A. Tullia, followed by a pause due to the political changes after the collapse of the coup regime and re-acquisition of the internet assets of Nova Roma, including the Censorial Database, and re-started this year, under the censorship of A. Tullia and Cn.

Lentulus, especially this December, under the suffect censorship of A. Tullia and C. Tullius. The following offices conducted the current census:

### **1. First Officium Censorium starting the Census**

Sex. Lucilius Tutor, censor

A. Tullia Scholastica, censor

Cn. Cornelius Lentulus, scribe censorius caput Officii Censorii

C. Claudius Quadratus, scribe censorius ad Censum

### **2. Second Officium Censorium continuing the Census**

A. Tullia Scholastica, censor

Cn. Cornelius Lentulus Alexander, censor

Cn. Cornelius Lentulus, scribe censorius caput Officii Censorii

*(scribe censoris Cn. Corneli Lentuli Alexandri)*

Ap. Curius Rullus, scribe censorius

*(scribe censoris A. Tulliae Scholasticae)*

### **3. Third Officium Censorium concluding the Census**

A. Tullia Scholastica, censor

C. Tullius Valerianus Germanicus, censor

Cn. Cornelius Lentulus, scriba censorius caput Officii Censorii

*(scriba censoris Cn. Corneli Lentuli Alexandri)*

Ap. Curius Rullus, scriba censorius

### **I. Summary and Introduction**

The Censores conducted a census of all citizens of Nova Roma from a.d. V Id. Mar. Q. Arrio Nauta et P. Annaeo Constantino Placido cos. (11 March 2019), opening the census with the EDICTVM CENSORIVM DE LEGIBVS CENSVI CENSENDO. That edict contained the legal basis and regulation for the current census. This present edict contains some more regulations that were not previously proclaimed:

I.A.1. The last complete census was held in P. Ullerio C. Equitio cos. (2011). Partial census was held in L. Sulla (III) cos. sine collega (2013), without registration of the citizens, only with a lustrum ceremony. Due to the internal conflict ("coup d'état of Caesar and Sulla" and "civil war"), the census of the year M. Pompeio Sex. Lucilio cos. (2015) was aborted and the illegal tyrant destroyed the Census Office that was about completing the census, led by scriba C. Claudius Quadratus. We would like to remember and recognize the hard work of C. Claudius Quadratus, which was sadly done in vain in M. Pompeio Sex. Lucilio cos.

I.A.2. At the Completion of the Founding of the Nova Roman Nation ritual, as the required religious and ceremonial act of founding, a ritual

census and lustrum was held on Id. Oct. Sex. Lucilio, C. Claudio, P. Annaeo, Q. Catulo. tr. mil. cos. pot. (2017), by interrex and rex sacrorum Cn. Cornelius Lentulus Alexander. That census and lustrum united the world's nascent Roman People with the Nova Roman People and made the two one single body politic by the acquisition of the Nova Roman Republic by the nascent worldwide Roman people, the Quirites. This was the last lustrum conducted, and the first one opening our new era. The current census and lustrum concludes our first period of life in the new era of Nova Roma since it has been united with all people of Roman identity of the world.

I.B.1. The current census was started by censores Sex. Lucilius and A. Tullia, and the censores would like to recognize C. Claudius Quadratus second involvement with the census under the censorship of Sex. Lucilius and A. Tullia: he started the registration process of the current census and single-handedly registered about 150 citizens and laid the foundation for the completion of the census next year, after a break caused by the tragic and very sad passing of censor Cn. Cornelius Lentulus Alexander. The censores also would like to recognize and praise the work of Ap. Curius Rullus who processed at least 500 registrations with heroic and exemplary diligence and dedication, and the chief of the censorial staff, Cn. Lentulus the Younger who completed a similar amount of work.

I.B.2. The current lustrum has been performed today by censor C. Tullius Valerianus Germanicus, augur, also in the name of censor A. Tullia Scholastica, assisted by pontifex Q. Caecilius Metellus Pius Postumianus and advised and instructed by pontifex Cn. Cornelius Lentulus.

I.C. Resolved by this edict and under the authority of the senatus consultum ultimum, the current census automatically (without the need of registration) includes, besides those mandated by the leges, not only the new citizens of the census years (2019-2020), but also the new citizens who arrived after the coup and aborted last census attempt, in

the years Cn. Lentulo T. Domitio cos. – C. Claudio T. Domitio (II) coss. (2016-2018), because they could be registered lawfully only after the beginning of the current census in Q. Arrio P. Annaeo cos. (2019). This involved 98 citizens. The current census automatically includes also those liberator citizens who joined the legions of Nova Roma as reservist members fighting by legal means for saving Nova Roma (in macronational term, 'plaintiffs'), as they were the most active and most deserving citizens in this census period to whom we can thank that Nova Roma still exists today.

## **II. The results of the Census**

II.A. The results of the census of the Nova Roman People is the following: at the moment of the closing of the census, there are 929 citizens registered in the census, and we have 5596 Nova Roman citizens of different legal statuses in total. The number of people who have ever been citizens of Nova Roma, together with those who passed away or renounced their citizenship, is 5939 according to the present statistics and calculations of the Censorial Office.

II.B. Before the start of the census, there were 1495 active (census registered) citizens, accumulating since the last completed census in P. Ullerio C. Equitio cos. (2011).

II.C. The total number of Nova Roman citizens (census registered, active citizens, and unregistered, disappeared citizens) is 5596, out of which number 929 are currently registered good standing citizens, and 4667 failed to answer this or any of the past censuses of Nova Roma. Out of the current 4667 unregistered citizens, the number of those formerly census registered citizens who haven't answered the current census is 763; the others didn't respond to previous censuses. The surplus difference between the number of those have become inactive by this census and those who registered on the current census comes from the number of returning citizens who were not registered before this census (who failed to register on previous censuses) but who returned now upon

the general call to all unregistered inactive citizens and currently registered active citizens of Nova Roma.

II.D. At the moment of the closing of the census, Nova Roma has 55 pending citizens in provisional approval who can become full right citizens in any moment, 430 pending citizens who haven't yet confirmed their intention to join or haven't yet decided on their name, or who possibly still ponder joining Nova Roma, and 4 incoming applications for citizenship.

II.E. At the moment of the closing of the census, the number of all citizenship applications that the Censorial Office has ever received for Nova Roman citizenship is 16681, out of which number a great percentage were repeated applications by the same applicants. There have been at least 9427 individual applicants for citizenship since the founding of Nova Roma according to the statistics and calculations of the Censorial Office, 3488 of whom have never completed their process of obtaining citizenship.

## **V.D. The Assidui and the Classes and Centuries**

The number of tax paying citizens, the assidui, representing the elite of Nova Roma, at the time of the conclusion of the census is 121. In comparison, in many of the previous years this number was well below 100, sometimes around 60-70. The current 121 assidui are distributed by the censores into classes and centuries and rural tribes as follows. It shall be noted that during election 6 Extra Centuries were added to compensate for the disproportionate number of 3rd Class citizens. The censores who that the recent lex Arria de censu civium aestimando will correct the disproportionate nature of classes by the new Census Point system. The censorial distribution of assiduus citizens in classes and centuries based on their census can be seen in this table:

V.E.1. The remaining 808 capite census are equally distributed among the urban tribes of Collina, Esquilina, Palatine and Suburana.

## **VI. Closing Provisions**

With this, the Nova Roman People of the Quirites, dedicated to the nascent Roman Nation of the world, has been counted, conscribed, lustrated, purified, consecrated and blessed for the next period of its mission and history. The census is complete. Any subsequent changes, remaining issues, points to clarify or expand are hereby, by this edict, delegated to the consuls of the next year and to the Censorial Office.
